

EARTH

2022 TOBY AWARDS ENTRY REQUIREMENTS

THE OUTSTANDING BUILDING OF THE YEAR AWARDS

CATEGORY DESCRIPTION

Earth Buildings

All Office buildings where the building ownership and building management team preserve and enhance the internal and external environment through green and sustainable programs.

Office buildings present a significant impact on the environment and the many convergent communities inside and outside the space. This award is given to those office buildings that best demonstrate successful application of a wide range of environmental sustainability and ESG (Environmental, Social, and Corporate Governance) practices and policies that identify, measure, mitigate and communicate these impacts.

ELIGIBILITY

1. The building must win at the local level to advance to the regional level and must win at the regional level to advance to International.

NOTE: At-Large entries, entries that are outside the jurisdiction of a local association, must submit their portfolio directly to their region using BOMA International's TOBY website at <https://toby.boma.org> for regional judging and must notify their regional awards chair of their intention to compete.

2. All portfolios must have undergone a building inspection and scored at least 70% to be eligible to compete. Each entrant must upload the completed and signed TOBY Building Inspection Verification form to be eligible to compete at the Regional and International level (this form is provided by your local BOMA association or International Affiliate organization).
3. The building must be a member, or managed by an entity that is a member, in good standing with both their BOMA local association and BOMA International to compete at the local, regional and international levels. Specifically, all membership fees, and any other debt, must be paid prior to entry.
4. The building may not have won in the same category at the international level during the last 5 years (i.e. Buildings that win in 2021 are not eligible to compete until 2026 and awarded in 2027). The building may not have won in a different category at the international level during the last 3 years (i.e. Buildings that win in 2021 are not eligible to compete until 2024 and awarded in 2025).
5. The building must be occupied for at least one full year from the date of occupancy of the first tenant by **June 15, 2021** with a minimum of 12 months of building operations.
6. All buildings must have at least 50% percent average annual occupancy (leased occupancy based on square footage).
7. Each building may enter in only one category.

8. **All Entrants are required to provide the following:**

- Provide a copy of the Statement of Energy Performance generated from ENERGY STAR® and/or Official Letter from EPA or ENERGY STAR® Certificate of Achievements received within the past 24 months.
- Share data with BOMA International in ENERGY STAR® Portfolio Manager.

Any entry that does not include both a and b will not be eligible to compete at the International level.

To share your data with BOMA International, go to the Facility Summary page in ENERGY STAR® Portfolio Manager by clicking on the facility name on the My Portfolio page. Select “Add user to share this facility” under the Sharing Data section (on the right-hand side of the page) and follow the instructions.

- An Entrant may choose to enter multiple buildings as a single entry only if the buildings are owned by the same company, managed by the same company and the buildings are managed as a single entity and not within a suburban office park. All Entrants must disclose whether their entry is a single building or multiple buildings under the Building Standards section.
- For any building that enters the competition at the local and regional level that may encounter a change in management and/or ownership and wins at the International level, the award will be presented to the management company/owner at the time of the original entry.

Additional Requirements for Non-U.S. entries:

Canadian Entrants are required to obtain a BOMA BEST® Sustainable Buildings certification. Each entrant must provide a copy of the certificate or letter from BOMA Canada attesting certification is valid in the competition year.

Other International Entrants should contact BOMA International regarding any questions on energy performance benchmarking requirements.

MANDATORY ON-SITE BUILDING INSPECTION

Building inspections must take place at the local level of competition to ensure the entry meets the eligibility requirements and is registered in the correct category. A minimum score of 70% must be earned to be eligible to compete for a TOBY.

TOBY judges have been given the option to conduct on-site or virtual inspections at the discretion of the BOMA local association.

For more information, please refer to the TOBY Awards Virtual Site Inspection document – https://toby.boma.org/Documentation/2020_06_16_TOBY_Inspections%20COVID_19_FINAL.docx

Local building inspection forms can be found at <https://toby.boma.org/docs.aspx> - Log in using your BOMA International log-in information to access document.

- The following mandatory items must be inspected during the building inspection:
 - Building Environment - IAQ Performance
 - Energy Performance/Energy Management System Monitoring
 - Refuse/Recycling Programs
 - Water Performance/Water Management
 - Multi-Tenant Corridors
 - Restrooms
 - Typical Tenant Suite

8. Landscaping/Site Management
9. Submetering

10. Occupant Communication/Education – Visibility
11. Green Cleaning

- The following documentation is mandatory where applicable and should be made available. On-line versions are acceptable but must be available at time of inspection at the property being inspected. Ease of navigation is essential to ensure that judges can easily and readily review:
 1. Preventive Maintenance Manual
 2. SOP Manual/Documentation of Standard Operating Procedures (online or printed)
 3. Environmental Purchasing Policies
- Entrant should receive the TOBY-Earth Building Inspection Verification form by their local BOMA or affiliated International affiliate organization. Any entry without an Inspection Verification form with their Regional submission will be disqualified.

ENTRY FEES

LOCAL ENTRY FEES

A local competition fee may be applicable. Each Entrant should check with their local association concerning fees.

REGIONAL AND INTERNATIONAL ENTRY FEES

1. A total of \$375 USD in entry fees will be paid to BOMA International for each submission entering the regional competition. These fees will be collected during the online submission process. Fees are broken down as follows:

- a) A \$50 USD data-submission fee will be collected for each building added to the online system. Buildings may be added regardless of whether they have won at the local level or not. Adding a building does not enter that building in the regional or international competitions.
- b) A \$325 USD entry fee must be paid to submit a building for consideration in the regional and international competitions.

2. An additional regional competition fee may apply. If applicable, the regional competition fee will be collected online along with the entry fees above.

NOTE: All entries must be submitted, and fees received prior to your region's submission deadline in order to compete. Fees are non-refundable. Regional deadlines will be posted on <https://toby.boma.org>.

JUDGING / DATA / DEADLINES

1. Judging will occur at local, regional and international levels.
2. Energy Star data must be shared with BOMA International no later than **March 31, 2022** to be eligible to compete on the International level. Provide a copy of the Statement of Energy Performance generated from ENERGY STAR® and/or Official Letter from EPA or ENERGY STAR® Certificate of Achievement received within the past 24 months must be included with the submission in the appropriate section. This is a requirement for entries in all countries. Canadian Entrants must include the BOMA BEST certificate or letter from BOMA Canada attesting certification in addition to the ENERGY STAR® requirement above. Omission of the ENERGY STAR® requirement and, for Canadian Entrants, the BOMA BEST certificate or letter **AND** data sharing through the online

ENERGY STAR® Portfolio Manager will automatically disqualify an entry. Fees are non-refundable due an entry that is disqualified for non-compliance.

Country	ENERGY STAR® Statement of Energy Performance or Official Letter from EPA or ENERGY STAR® Certificate of Achievement	Data sharing through ENERGY STAR® Portfolio Manager	BOMA BEST Certificate or Official Letter
All Entrants	✓	✓	
US Entrants	✓	✓	
Canadian Entrants	✓	✓	✓
European Entrants	✓	✓	

- Each BOMA local association may submit one building in each category to the regional competition.
- Each BOMA region may submit one building in each category to the international competition.
- Each region must submit their regional winners to BOMA International by **April 8, 2022**.
- Judging at the international level will occur in April and May and the TOBY Awards will be presented during the BOMA International Conference.
- Updated Entry Requirements will be presented during or prior to the BOMA International Conference.
- BOMA International's TOBY website (<https://toby.boma.org>) will begin accepting entries for each new season approximately 1 month after the close of the BOMA International Conference. Check the TOBY website for specific dates.

UNIVERSAL PORTFOLIO REQUIREMENTS

Photograph Requirements

- File Type: Hi Resolution JPEG compressed
- Maximum File Size: 2MB
- Do not use photograph collages (Only single images)

Supporting Document Requirements

- File Type: PDF, DOC, DOCX, RTF, TXT
- Maximum File Size: 5MB

Descriptive/Summary Text Requirements

- Maximum word count is specified for each section

NOTE:

- Descriptive/summary text must be entered in the text box provided and may not be submitted as an uploaded file.
- Identify what an acronym represents at least once in each document.
- Text within required supporting documents does not count against character limits.

RECOMMENDATION

Text should be created in Word, or other similar program, and then copied and pasted into the text box. Please spell check prior to pasting into the text box. Confirm that the copied text can be fully viewed on-line. If not, reduce the characters to fit the requirements.

PORTFOLIO SPECIFICATIONS

A. BUILDING DESCRIPTION – 1 POINT

Provide a summary of the physical description of the building(s), property and location.

***Maximum of 350 words
No attachments allowed***

B. EXECUTIVE SUMMARY – 2 POINTS

Provide an overall summary of the property's (building, office park, etc.) overarching policy for environmental, sustainability, energy efficiency, wellness, etc. Describe the policies and philosophy of the property's ownership and management relating to this subject. Include if the project was built with this philosophy in mind or if it was implemented after construction and why this concept is important.

Attach the following:

- TOBY Inspection Verification
- Organizational chart for staff with qualifications
- Copy of any certifications and/or awards that have been achieved that are not related to ENERGY STAR® or BOMA BEST (optional)

*Buildings that do not earn the maximum 3 points in the building description and executive summary section may earn one point if they are a BOMA 360 designee.

***Maximum of 600 words
Total of 2 attachments required, (up to 3 attachments allowed).***

C. COMPETITION PHOTOGRAPHS – 2 POINTS

All Office Buildings – Total of 7 photographs required

1. 2 Exterior
2. 1 Interior (lobby and hallways)
3. 1 Standard tenant area
4. 1 Central plant or main mechanical room (chiller, fire pump or boiler room)
5. 2 Additional photographs, the subject matter of which is the entrant's choice

No text is required

D. AWARDS CEREMONY PHOTOGRAPHS – 0 POINTS

In addition to the competition photos, all regional and international entrants must submit one high resolution (minimum 300 dpi) 11" x 14" color JPEG (JPG) of the **building's exterior** for display at the awards ceremonies. Also, a photograph of the **management team** responsible for daily management of the building(s) is required.

***No text required
Total of 2 attachments required***

E. CLIMATE CHANGE & ENVIRONMENTAL RISKS MANAGEMENT – 20 POINTS

1. Climate Change Risk Assessment & Management

- a. Have you completed a climate change risk assessment to understand long-term risks to the building and site in the face of climate change? If so, please describe.

Examples: changes in long-term weather patterns; changes in the frequency of extreme weather events and natural hazards; rising sea levels; increased desertification, etc.

- b. Describe tools used to measure and monitor greenhouse gas emissions or carbon impacts.
- c. Describe the building's current carbon management plan and carbon reduction targets.

Examples: purchase of renewable credits or carbon offsets, etc.

- d. Describe the building's climate change resilience plan and how it proposes the building will adapt to expected future risks, including measures and design features to address potential consequences of long-term climate change.

Examples: extreme weather events, water scarcity, increase in ambient temperature, etc.

- e. Describe measures to enhance, restore and protect the local ecosystem from climate change risks, biodiversity loss, habitat degradation, or pollution.

Examples: exterior site maintenance policy, façade cleaning, landscape management, urban heat island effect, erosion and sedimentation control; irrigation monitoring, stormwater management, light pollution reduction, etc.

2. Environmental Risk Assessment & Management

- a. Describe environmental risk assessments completed to understand issues of environmental concern affecting the property?
- How frequently are they conducted?
 - Describe the most recent audit – when was it completed, by whom, what parameters were assessed, and the findings?
 - Does the report confirm that the property is in compliance with regulatory requirements?
- b. Describe environmental management plans and procedures in place to address these environmental concerns? Please describe at least 3 concerns.
- c. Describe emergency response plans to protect against natural, technological, human-induced, or other hazards?

Examples: pandemic preparedness, disaster recovery, crisis management, training and drills, fire protection, testing, maintenance, awareness, notification protocols, etc.

- d. Describe the training program for Operations and Maintenance staff.

3. Innovation

- a. Describe any innovations in this area such as carbon neutrality plans, "net zero" plans, etc.

Attach the following:

1. Climate Change Risk Assessment
2. Environmental Risk Assessment (i.e. Hazardous Building Materials Survey, Phase I Environmental Site Assessment, etc.)
3. Environmental Management Plan (i.e. one of the following: Asbestos Management Plan, Storage Tank Management Plan, Mold Management Plan, etc.)
4. Climate Change Resilience Plan (optional)
5. Emergency Response Plan (optional)
6. Carbon Management Plan (optional)
7. Documentation of any measures to enhance natural environment (optional)

NOTE: Do not include entire manuals. Include only the table of contents, a summary of the manual and how it's implemented.

Maximum of 1,750 words

Total of 2 attachments required, (up to 7 attachments allowed).

F. INDOOR ENVIRONMENTAL QUALITY – TOTAL OF 15 POINTS

1. Describe measures that have been taken for lighting and visual comfort.

Examples: lighting audits; illuminance metering; day light harvesting; task lighting; zoned lighting; occupancy sensors; glare reduction, etc.

2. Describe the most recent Indoor Air Quality (IAQ) assessment report and how it was utilized to make improvements.

3. Describe the policies and procedures in place at the building that enhance indoor thermal comfort and indoor air quality.

Examples: IAQ issues reporting and how issues are addressed; IAQ assessments; IAQ audits; IAQ monitoring; tobacco smoke control; measures to ensure effective ventilation; HVAC filtration; contamination source protection, etc.

4. Describe occupant indoor environmental comfort surveys conducted to evaluate satisfaction levels with air quality, acoustics, thermal comfort, lighting and visual comfort etc.? Include the most recent survey conducted – when was it completed, tenant response rate, what questions were included, and the findings?

5. Has an assessment of background sound levels been conducted for the building? If so, describe the most recent audit conducted – when was it completed, by whom, and what were the findings?

6. Are any measures in place to minimize strong smells?

Examples: scent-free building policy; use of negative pressurization; self-closing doors, or interstitial rooms, etc.

7. Describe the integrated pest management program in place.

8. Describe ways that you educate, engage or collaborate with tenants to support their indoor environmental comfort.

Innovation

9. Describe any innovative equipment or procedures used to enhance the indoor environmental comfort for your occupants such as: sound-masking equipment; sound-absorbing materials; hydronic radiant heating or cooling; electric radiant heating, etc.

Attach the following:

1. Indoor Air Quality Policy and Annual Assessment
2. Tenant IAQ Request Logs (one-year tracking) including key performance indicators
3. Most recent Indoor Air Quality Monitoring report from the past 24 months
4. Occupant indoor environmental comfort survey from past 24 months
5. Scent-free policy (or equivalent) (optional)
6. Awards or certifications related to indoor air quality (i.e. RESET Air Certification, etc.) (optional)

Maximum of 1,750 words

Total of 4 attachments required (up to 6 attachments allowed).

G. GREEN CLEANING – TOTAL OF 15 POINTS

1. Green Cleaning Policy & Program:

- a. Describe how often the policy is reviewed and updated. Include the checks and balances used to ensure policy is followed.
- b. Describe the steps taken to ensure use of green products and cleaning chemicals by both in-house staff and contractors/vendors.
- c. Describe the use of environmentally preferred products, maintenance of cleaning equipment and effective cleaning practices.
 - Include standard operating procedures in place for cleaning activities.
- d. Describe how cleaning logs are maintained and what is included.
- e. Describe low-impact cleaning procedures in place.

1. Communication:

- a. Describe how tenants are made aware of the cleaning policy and procedures and encouraged to participate.
- b. Describe training program for cleaning staff.

2. Green Cleaning Products and Equipment/Devices:

- a. Describe what percentage of cleaning products and supplies carry a third-party certification (e.g., EcoLogo, Green Seal, US EPA Safer Choice, GREENGUARD, Forest Stewardship council etc.) 50% or higher is preferred
- b. Describe what percentage of cleaning devices and equipment carry a third-party certification from the Carpet and Rug Institute or meet California Air Resources Board or the ISSA Cleaning Industry Management Standard for sound levels or less than 70dBa

3. Cleaning Audit:

- a. Describe annual cleaning audit and how it is performed, by whom and how it is communicated to the stakeholders. Include confirmation that products are being used appropriately and that cleanliness goals and objectives for each space are being met.

4. Innovation

- a. Describe any innovative equipment or supplies used onsite, such as the following: HEPA filters for vacuum cleaners, devices that use ionized or electrolyzed water, third-party certified or ultraviolet cleaning devices.

Attach the following:

1. Green Cleaning Policy
2. Annual Cleaning Audit
3. Sample Tenant Communication

Maximum of 1,500 words

Total of 3 attachments required.

H. WASTE MANAGEMENT – TOTAL OF 10 POINTS

While waste reduction and diversion initiatives provide an opportunity for building managers to reduce operational costs, it is also an area that can inspire the most engagement from occupants, further supporting the building's sustainability objectives.

1. Policies, Plans and Programs

- a. Include the building's waste reduction and diversion commitments.
- b. Describe the building's Solid Waste Management Program including strategies for source separation, collecting, handling, and storing all waste streams, as well as specialty diversion initiatives (e.g., reuse initiatives, e-waste, etc.)
- c. Describe the construction waste reduction program including objectives and types of materials targeted.

2. Data collection and analysis

- a. Provide the building's waste audit performed in the last three (3) years and completed by a competent professional.
- b. Provide the building's Diversion AND Capture Rate as calculated in the most recent waste audit.
- c. Describe the type of data (e.g., volume, weight) collected from waste contractors as part of regular collection services.
- d. Describe the analysis conducted to identify year over year waste reduction trends.
- e. Describe waste performance tracked in Energy Star using the waste and materials tool.

3. Communication and Training

- a. Describe how the results of the waste audit are shared with occupants.
- b. Describe the communication and training strategies in place to support the Waste Reduction and Diversion Policy, including type and frequency of tenant and staff engagement activities and staff/tenant training on proper use of waste infrastructure.
- c. Describe the staff and contractor training and communication strategies in place to ensure adherence to the construction waste reduction program.
- d. Describe how compliance is monitored and tracked.

4. Innovation

- a. Describe the building's zero waste targets for ongoing operations or special events.

Attach the following:

1. Waste Reduction and Diversion Policy
2. Solid Waste Management Program
3. Waste Audit (performed in the last 3 years) showing the diversion and capture rates
4. Waste report from Energy Star portfolio manager
5. Sample tenant communication (optional)
6. Construction waste strategy (optional)

Maximum of 1,750 words

Total of 4 attachments required (up to 6 attachments allowed)

I. PURCHASING AND INTERIOR FINISH – TOTAL OF 10 POINTS

Environmental Purchasing

An environmental purchasing program provides an opportunity to ensure that products used within the building support occupant health and wellbeing. Environmental criteria can also help reduce waste generated at the building by specifying materials that can be easily diverted from landfill or returned to the manufacturer for re-use or remanufacturing.

1. Policies, Plans and Program:

- a. Attach the Environmental Purchasing Policy and provide details such as how purchases are completed and quantified on 3 of the 5 following requirements:
 - i. Office Supplies: At least 50% of office supplies should carry a third-party certification from Forest Stewardship Council; or contain at least 10% post-consumer material; or at least 20% pre-consumer material; or at least 50% rapidly renewable materials; or use only rechargeable batteries.
 - ii. Furnishings: Selection should be based on the following considerations: longevity, repairability, re-configurability, ability to be returned to the manufacturer at the end of its life.
 - iii. Operations and maintenance products: Describe percentage of products used for building operations and maintenance that carry a third-party certification from EcoLogo, Green Seal or GREENGUARD
 - iv. Materials and interior finishes:
 - Describe procedures for construction materials and interior finishes for tenant and base building construction.
 - Describe percentage that carry a third-party certification from Green Seal, Green Guard, EcoLogo, Cradle to Cradle, ENERGY STAR, WaterSense, Forest Stewardship Council, Sustainable Forestry Initiative, or the Canadian Standards Association's Sustainable Forest Management Standard, etc.
 - v. HVAC equipment: Describe percentage that is high-efficiency and meets ASHRAE 90.1, ENERGY STAR or WaterSense standards.

2. Engagement and Training:

- a. Describe how the Environmental Purchasing Policy is shared with building staff, and contractors.
- b. Describe how tenants are required to comply with specific environmental criteria favoring the use of environmentally preferred construction materials, interior finishes, equipment, furnishings etc. (e.g., via green lease, green design criteria handbook or other method).

3. Innovation:

- a. Describe how the Environmental Purchasing Policy supports circular economy principles.

Attach the following:

1. Environmental Purchasing Policy with preferred/required list of products
2. Samples of recent purchases based on the environmental purchasing program
3. Tenant Design Criteria manual or Green Lease
4. Sample tenant communication (optional)
5. Evidence of staff training (optional)

Maximum of 1,500 words

Total of 3 attachments required (up to 5 attachments allowed)

J. ENERGY & WATER – TOTAL OF 25 POINTS

IMPORTANT: In this section, all Entrants from all countries are required to utilize the ENERGY STAR® Portfolio Manager to measure their current rating in ENERGY STAR® and provide the Statement of Energy Performance report generated from ENERGY STAR® and/or Official Letter from EPA or ENERGY STAR® Certificate of Achievement. Canadian Entrants must also provide the BOMA BEST certification or letter.

1. Provide a brief description of the following: (2 of 25 points)

- a. A list of areas for which energy consumption data is available (i.e. all tenants, some tenants, interior common exterior common) and the type of energy used, (i.e. electricity, natural gas, other).
- b. Percentage of occupied gross leasable area for which you have energy consumption data (either through sub-metering or by other means). The data must represent consumption from the most recent 12-month period and must not be any older than the past 18 months.
- c. Describe how current energy consumption is being compared with consumption from past years and provide conclusions drawn from the analysis over a minimum of 1 year.

2. Provide a copy of the Statement of Energy Performance printed from ENERGY STAR® received within the past 24 months. (1 of 25 points)

3. Share your data with BOMA International in ENERGY STAR® Portfolio Manager. (1 of 25 points)

Any entry that does not include both 2 and 3 will not be eligible to compete at the International level.

4. Energy and Water Management Plan (2 of 25 points)

- a. Describe the most recent building-wide Energy and Water Audit (include the date of completion and immediate actions taken based on the results).
- b. Provide an outline of energy and water conservation measures planned for implementation in the next 3 years.
- c. Describe building operations and maintenance procedures and how they contribute to energy and water conservation (e.g. preventative maintenance programs; equipment and system performance monitoring; water leak inspections; etc.)

5. Energy and Water Consumption Monitoring (1 of 25 points)

- a. Describe tools used to monitor monthly consumption (e.g. spreadsheets, portals, monitoring programs with third parties, etc.)
- b. Describe any energy or water submetering in place.
- c. Compare current energy and water usage with past consumption and any reductions achieved.
- d. Describe the buildings' current energy and water reduction target(s).

6. Education/Training (1 of 25 points)

- a. Describe energy and water conservation training programs for building operations and management staff in the last 2 years.
- b. Describe energy and water conservation training programs for tenants in the last 2 years.

7. Energy Efficient Features (1 of 25 points)

- a. Describe the type of lighting installed throughout the building.
- b. Describe any high-efficiency building equipment.
- c. Describe energy-efficient control strategies used on the BAS.

8. Water Efficient Features (1 of 25 points)

- a. Describe washroom fixture standards and note what percentage of fixtures are low flow. Include flush and flow rates.
- b. Describe any water-efficient features of the irrigation system.
- c. Describe programs to reduce the use of potable water (e.g. use of native/drought-tolerant plant species, capturing rainwater and re-using for irrigation or plumbing; etc.).
- d. Describe cooling tower water management program.

9. Water Quality Program (2 of 25 points)

- a. Describe water quality testing program (frequency, parameters tested for, etc.)
- b. Describe any water treatment programs or water quality filtration systems (e.g. reverse osmosis systems, activated carbon filters, kinetic degradation fluxion filters, sedimentation filters, ultraviolet sanitation, etc.)

10. Innovative Technologies or Programs (3 of 25 points)

- a. Describe any innovative technologies or programs in place that go above and beyond the industry standard to improve energy and/or water performance. Include measurable results, if available.

Examples include: onsite renewable energy generation; real-time monitoring; demand response reduction programs; district energy systems; deep lake water cooling; heat/energy recovery systems; energy harvesting battery; ice storage system for load shedding; data analytics platforms; building-wide sensors connected to artificial intelligence platforms; etc.

Benchmarking & Performance Scoring

All buildings must benchmark their energy and water performance using ENERGY STAR® Portfolio Manager. As such, all entrants must upload a copy of the Statement of Energy Performance with data from the past calendar year.

Additionally, all entrants must share their data with BOMA International. To do this, have your ENERGY STAR® portfolio administrator go to “*Contacts*” (in the upper right-hand corner), click the “*Add Contact*” button, search for “*BOMA International*”, and click “*Connect*”. Once the connection request has been accepted, click on the “*Sharing*” tab and click on “*Share (or Edit Access to) a Property*” and follow the instructions. For additional guidance on sharing data, please click [here](#). **Any entry that does not share their data with BOMA International will not be eligible to compete at the International level.**

Entrants will be scored based on their ENERGY STAR score as follows:

- Score < 69: 4 points
- Score 70-79: 6 points
- Score 80-89: 8 points
- Score >90: 10 points

**For multiple buildings, use weighted average by square footage*

Attach the following:

1. Energy and Water Management Plan
2. Most recent Energy and Water Audit Report
3. Most recent Statement of Energy Performance and/or Official Letter from EPA or Energy Star Certificate of Achievements from ENERGY STAR®
4. BOMA BEST Certificate or letter from BOMA Canada attesting certification (required for Canadian entries)
5. Energy Star Certification (optional)
6. Documentation relating to the innovative technology/program (optional)

Maximum of 1,750 words

US Entries - Total of 3 attachments required (up to 5 attachments allowed).

Canadian Entries – Total of 4 attachments required (up to 6 attachments allowed).

K. STAKEHOLDER ENGAGEMENT – 10 POINTS

A Stakeholder is any person of interest or concern in the property, so this includes the Landlord, Property Management Team, Tenants, Vendors and the Community.

1. ESG (Environmental, Social, Governance)

- a. Describe the property level ESG program or policy in place and how it is implemented.
 - i. If no ESG program, describe what programs management have in place at their property to align themselves with standard ESG best practices.
 - ii. Describe training or resources in place to educate the stakeholders on the policy/best practices such as webinars, company training, ownership guidelines, etc.

2. Wellness

- a. Describe policies management has implemented to create healthy work environments for employees and tenants and to promote sustainable communities.
- b. Describe at least three wellness amenities available to one or all the stakeholders, such as rest areas, access to outdoor spaces, drinking water provisions, walking trails, fitness areas, immunization clinics, access to farmers markets, shared gardens, etc.
- c. Describe how stakeholders are actively engaged, such as with mental health webinars, yoga workshops, etc.
- d. Describe building features that address the health and wellbeing of the stakeholders such as daylight levels, lighting controls, glare controls, user comfort controls, smoking policy, acoustic conditions, etc.
- e. Describe available methods of alternate transportation such as trolleys, bus stops, carpool programs, bike racks, bike rentals, etc.
- f. Describe programs in place for management company employees that support wellness.
- g. Describe programs implemented since the outbreak of COVID-19 which you will keep in place to reduce contagious disease transmissions. Examples include hand hygiene standards, health promotion signage, infectious disease plan response guidelines, contagious disease outbreak preparedness plan, enhanced cleaning, disinfecting and maintenance protocol, PPE Guidelines, etc.

3. Community Engagement

- a. Describe programs in place to encourage all Stakeholders to have engagement with local communities through building and tenant outreach as well as volunteerism. Examples include charitable contributions, volunteer programs, local causes, health issues, promotional events, etc. Include how long each program has been in place.
- b. Describe if the impact can be quantified as additional income for the community or charitable event or has some type of savings associated with the impact.

4. Innovation

- a. Describe innovative technologies or programs in place that go above and beyond the industry standard for ESG, wellness or community engagement.

Examples include dedicated multi-purpose rooms; subsidized access to fitness; access to crop share; fresh food delivery services; access to restorative gardens; healthy food and beverage vending; subsidized vending, etc.

Attach the following:

1. Sample of Stakeholder Communication
2. Diversity Policy
3. One Example of Community Engagement or Wellness Features (e.g., photo or flyer)
4. ESG Policy (if any) (optional)

Maximum of 1,750 words

Total of 3 attachments required, (up to 4 attachments allowed).

***** END OF APPLICATION *****

SUBMITTED CONTENT

Building Registration Information and the Building Description may be used in Awards Program materials and with the media. Photographs may be used, with attribution, in Awards Program materials, with the media and in other BOMA International materials. All other content may be used by BOMA International in the creation of new industry materials. BOMA International will not include identifying information, such as building name, owner, etc., in these materials without the entrant's consent.

Building Owners and Managers Association (BOMA) International

The Building Owners and Managers Association (BOMA) International is a federation of 86 BOMA U.S. associations and 18 international affiliates. Founded in 1907, BOMA represents the owners and managers of all commercial property types including 10.5 billion square feet of U.S. office space that supports 1.7 million jobs and contributes \$234.9 billion to the U.S. GDP. Its mission is to advance a vibrant commercial real estate industry through advocacy, influence and knowledge. Learn more at www.boma.org.

BOMA International • 1101 15th Street, NW, Suite 800 • Washington, DC 20005 • 202-326-6300 • <https://toby.boma.org>
